## PROFILE SUMMARY

BCA graduate and AWS Cloud Intern with hands-on experience in AWS, Docker, Jenkins, Terraform, Kubernetes, and CI/CD. Skilled in cloud infrastructure, automation, containerization, and monitoring through practical projects.

## INTERNSHIP EXPERIENCE

AWS Cloud Intern | Davine Technologies

August 2026 – Present

- Gained hands-on experience with AWS cloud infrastructure and core AWS services.
- Created and configured Amazon EC2 instances and Security Groups.
- Worked with basic AWS networking and cloud resource configuration.
- Developed practical knowledge of AWS cloud operations and infrastructure management.

## EDUCATION

Cluster University of Jammu

Jammu, J&K

**Bachelor of Computer Applications (BCA)**

2021 – 2024

## SKILLS

**Technical Skills:**

**Cloud Platform:** AWS (EC2, IAM, S3, VPC, Load Balancer, Auto Scaling) | **Infrastructure as Code (IaC):** Terraform |

**Monitoring:** Prometheus, Grafana | **Scripting Language:** Python | **Configuration Management:** Ansible |

**Containerization & Orchestration:** Docker, Kubernetes | **CI/CD:** Jenkins | **Operating Systems:** Linux | **Version Control:** Git, GitHub

## PROJECTS

### 1. Continuous Integration and Observability for Containerized Applications

**Tools & Technologies:** Terraform, AWS EC2, ECR, Jenkins, Docker, Git, GitHub, Linux, Prometheus, Grafana

- Provisioned AWS infrastructure using Terraform and deployed containerized applications on Amazon EC2.
- Built an end-to-end pipeline using GitHub, Jenkins, Docker, Amazon ECR, and AWS EC2.
- Implemented monitoring using Node Exporter, Prometheus, and Grafana.

### 2. End-to-End CI/CD Pipeline for Containerized Application Deployment on Kubernetes

**Tools & Technologies:** GitHub, Git, Linux, Jenkins, Docker, AWS EC2, ECR, IAM, Helm, Kubernetes (K3s)

- Designed and implemented an end-to-end CI/CD pipeline using GitHub Webhooks and Jenkins for automated build and deployment workflows.
- Containerized the application using Docker and managed image storage and versioning through AWS ECR.
- Automated application deployments to a Kubernetes (K3s) cluster using Helm charts, ensuring consistent and repeatable releases.
- Integrated a manual approval stage within Jenkins to support controlled deployments and Continuous Delivery practices.
